EAN13: -
UPC: -

Product description:

Our visual check fuel sampler Qualijar® allows a visual inspection of aviation fuel as outlined in the JIG 1 Edition 12, article 2.2.3 guidelines. It is the ideal tool to inspect the presence of water or other contaminants. The sample jar allows as well temperature and density measurement thanks to an appendice which could be ordered separately. It is available in 4 Liters capacity for refuellers and hydrant dispensers.

Compliance with the JIG :

In accordance with the JIG bulletin n°123, we have made modifications to the drain hole of the Qualijar including :

- Enlargement of the fluid passage to better detect the presence of contaminants.
- The preservation of a design avoiding the passage of a SWD capsule in the case of the syringe being unhooked.
