

HOSE PRESSURE TEST PUMP 0-50B 1/2" BSP RIDGID 1450

Product codes: P

Product attributes:

Reference: PC691-00007 EAN13: -UPC: -

Product description:

Those presure test Fittings are manufactured from stainless steel and are designed for use with parrallel threaded hosetails, as commonly used with aviation refuelling hoses, and are available for thread sizes from 1 inch up to 4 icnh BSPP, both male and female.

For testing all kinds of installations, such as heating, compressed air and cooling systems, petroleum installations, sprinkler lines and small diameter pipes. With the automatic pressure holding valves, the user can easily pressurize the system. Compatible fluids are water, oil and ethylene glycol. Can be connected to the water supply for quick filling.
